ASSISTANT AND INSTRUMENT TABLE

Rini's instrument and assistant tables are designed for operating theatres, providing optimal user-friendliness and ergonomics for operating personnel.

ASSISTANT TABLE WITH SIDE-MOUNTED COLUMN

The assistant table has a column mounted to one side of the table. The standard version has three wheels and the short wheelbase ensures stability, even when the floor is uneven. The position of the wheels also contributes to the stability of the table by preventing it from tipping over.

The sound-absorbing tabletop is made from stainless steel, as is the wheelbase, which is equipped with ball bearings, allowing the table to be manoeuvred easily, quietly and safely. The height control is easily accessible for quick adjustments, and can be moved to any position on the table. A rechargeable battery powers the table.

INSTRUMENT TABLE WITH CENTRE COLUMN

This instrument table was developed at the request of operating personnel who needed a table with a high lifting capacity, good access and a large range of positions.

The instrument table's column is in the middle of the stainless steel tabletop. The underside of the tabletop is also made of stainless steel to allow easy cleaning. The top is sound absorbing and has a raised edge to prevent liquids from running onto the floor.

The wheelbase is made of bent, stainless steel pipes, with four lockable wheels that have ball bearings. This sturdy wheelbase offers extra stability, while also providing plenty of leg room and easy manoeuvrability.

The height controller is easily accessible for quick, smooth adjustments. It can also be moved to any position on the table.

FACTS

ASSISTANT TABLE, STANDARD CHASSIS

Length	730 mm
Width	550 mm

TABLETOP

Length	700 mm
Width	500 mm
Range of height adjustment	700–1100 mm

ELECTRICAL SPECIFICATIONS

Battery operation	24V
Charger	100–240 V, 50/60 Hz
Charging time	8–10 hours

OTHER

Lifting capacity	50 kg/110 lbs
Weight	23 kg/51 lbs

FACTS

INSTRUMENT TABLE, STANDARD CHASSIS

Length	970 mm
Width	620 mm

TABLETOP

Length	1200 mm
Width	600 mm
Range of height adjustment	850–1350 mm

ELECTRICAL SPECIFICATIONS

Battery operation	24V
Charger	100–240 V, 50/60 Hz
Charging time	8–10 hours

OTHER

Lifting capacity - instrument table	75 kg/165 lbs
Weight - instrument table	43 kg/95 lbs
